COTTON MARKETS.

New York, July 5-With nothing in the action of the cotton market at Liverpool to indicate any change of sentiment over the local holiday as a result of the government's resolution report of Menday, to-day's trading was dominated by drought complaints from the Southwest and reports that spinners in the Esst, were in the market for supplies in the Esst, were in the market for supplies in the local stock. Closing prices were steady

and reports from various markets are more optimistic than has been the case for some dime. Lack of action in the rubber stocks indicated disregard of trade conditions, which are now at a low ebb, judging from the fact that one of the largest plants in the New England district has announced a suspension of operations for a month. Attention was again called to the discouraging conditions in the textile industry by dispatches from South Carolina stating that all the cetton mills of the State had entered upon a drastic policy of tetranchment. There were numerous railroad re-	ing for nervous shorts and for ouiside de mand, fallure of the weather map to ind cate any relief for the drought in Texas an Okiahoma, buillab weekly weather reper and reports that the boll weevil damage; certain sections was on the increase.
